

There are eight planets in our Solar System

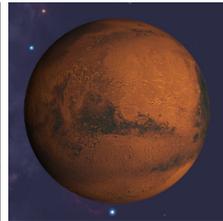

Mercury

Venus

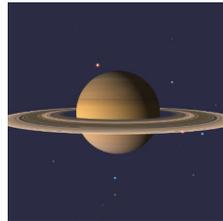

Earth

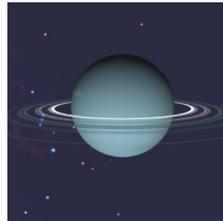

Mars

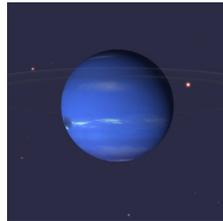

Jupiter

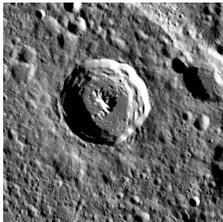

Saturn

Uranus

Neptune

Some planets like Mercury and Mars have big holes called craters.

Some planets have rings around them like Saturn, Uranus and Neptune.

Only one planet has life, the one we live on, Earth!

Draw A Planet Activities (Ages 5-7)

Draw your own planet!

Colour in your own planet and give it a name. Does your planet have craters, water or rings? Do any aliens live on your planet? What colours are your planet?

My planet's name is _____
