

Using Sky Tags to Tag Your Favourite Star - Activities (Ages 8-11)

Today we are going to learn:

- What are Sky Tags
- How they can be used
- How to create, edit and share Sky Tags

Activities

- 1 Today we are going to look at how you can highlight and categorise your favourite stars with Sky Tags. Using Sky Tags you can quickly find objects you are interested in and share them with your friends.

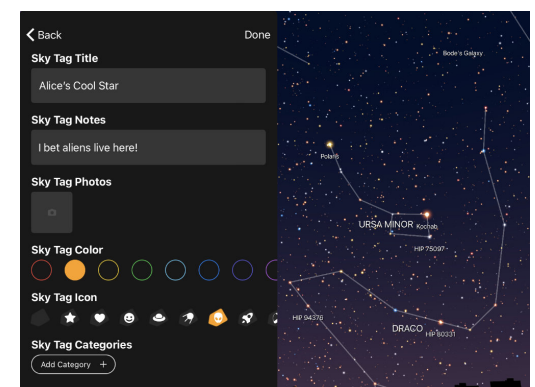

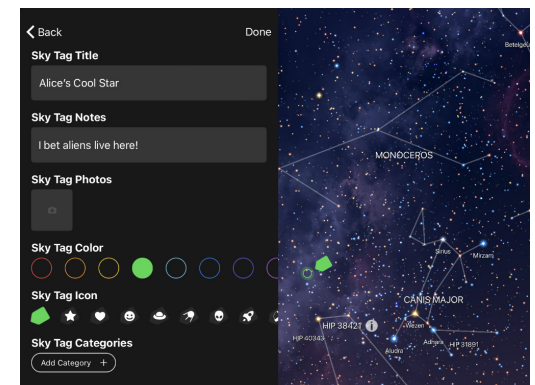

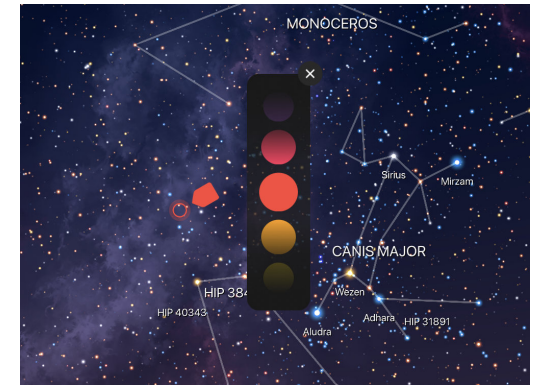

Activity: Pick a star and that you would like to highlight. Hold your finger where you want the Tag to go and a slider will appear to let you pick your favourite colour.

- 2 Now you are going to name your Tag and add any comments or notes you like. When you've picked your colour, a tile will appear on the left side of your screen where you can name your Tag.

Activity: Give your tag a name, for example 'My Favourite Star', and write something about the star in the notes, for example 'I saw this star on my birthday.'

- 3 Photos can be add to your Sky Tag. To add a photo tap on the grey camera square and choose from either 'Choose from Library' or 'Take Photo'.

Activity: Take a selfie and add it to your Tag. You can add more than one picture if you like.

Using Sky Tags to Tag Your Favourite Star - Activities (Ages 8-11)

- 4 You can pick a cool icon or change the colour of your Sky Tag. This will only show up whenever you have finished editing your Tag.

Activity: Pick out a new colour and fun icon to go with your Tag.

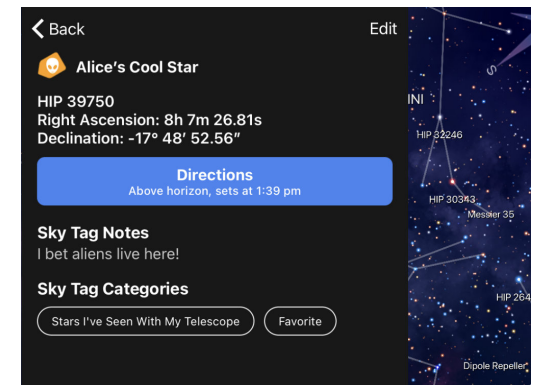

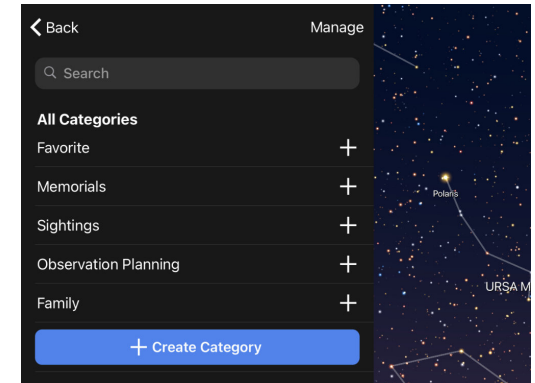

- 5 You can group your Sky Tags into different categories or you can make a new category of your own. To do this tap Add Category. A list of the current categories will appear and below this there is a button to create a new category.

Activity: Create your own personalised category and add your Sky Tag to it.

To make all your changes take effect remember to tap the Done button in the top right corner. When you have done this you will be asked if you want to add the Tag to your notifications. Select No. A tile will then appear with a blue Directions button to take you straight to your star. At the bottom of this tile there is an arrow  tap on this to share your Sky Tag with friends and family

Now we know how to:

- Create a Sky Tag for a star
- Edit and create categories for Sky Tags
- Add an icon and photo to a Sky Tag
- How to share a Sky Tag with friends

Well done!
You're a Night Sky
Superstar!
